### > ROPE DYEING CAN

These cans are specially developed for Denim manufacturers who use Rope Dyeing Plants.

**Dimensions:** 1500 mm diameter and 1750 mm height

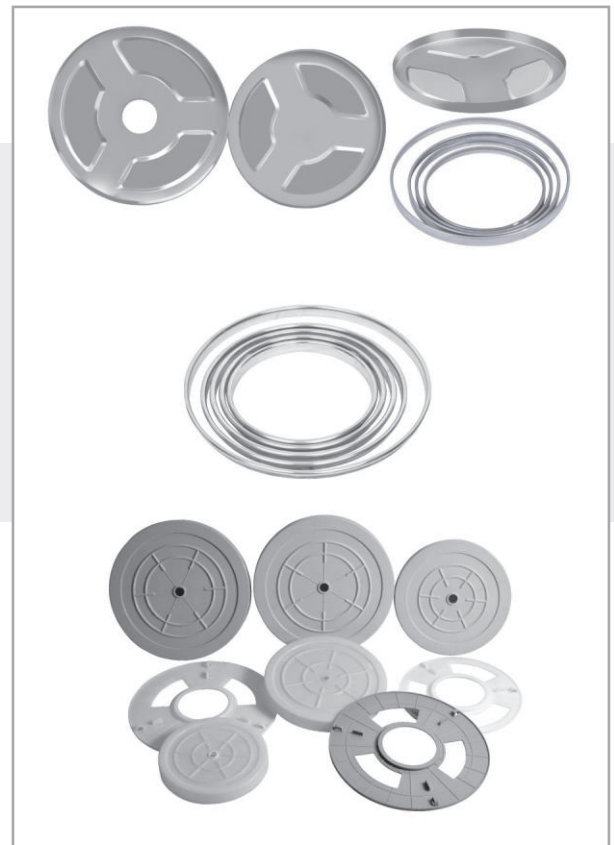

#### **CYLINDRICAL BODY:**

- > Made from Virgin quality High Density polyethylene sheets ensures smooth finish & cylindrical integrity which prevents sliver damage by rubbing.

#### **SPRINGS:**

- > Made from high carbon spring steel wire of grade II.
- > Pre tension springs are tested and filled with anti-slip surface ABS/PP/GI top plate and joined by PVC coated steel wire rope with steel base.
- > Plastic moulded brackets are provided on top plate for height adjustment.
- > For Cans of diameter 600 mm and above, stabilised pantograph springs are recommended which carries higher load of springs.

#### **BOTTOM PLATES & RING:**

- > Bottom plate and ring give support to the cans and hold the balance.
- > Bottom plates having castor fitting arrangements are supplied.
- > Bottom rings are made from angles and are welded with rod rings.

#### **TOP RING:**

- > The bands are swaged with top ring making the top robust and to hold cans firmly to the right shape.

#### **TOP PLATE & SPRING PLATE:**

- > Top plate & spring plate are made from unbreakable polymers and galvanised electro steel with anti slip surface.
- > Top plate has a friction surface to anchor the initial coils of sliver preventing throw-out.
